Package ‘AsioHeaders’

July 7, 2020

Type Package

Title 'Asio' C++ Header Files

Version 1.16.1-1

Date 2020-06-28

Author Dirk Eddelbuettel

Maintainer Dirk Eddelbuettel <edd@debian.org>

Description 'Asio' is a cross-platform C++ library for network and low-level I/O programming that provides developers with a consistent asynchronous model using a modern C++ approach. It is also included in Boost but requires linking when used with Boost. Standalone it can be used header-only (provided a recent compiler). 'Asio' is written and maintained by Christopher M. Kohlhoff, and released under the 'Boost Software License', Version 1.0.

AsioHeaders-package  The Asio C++ Library for Network and Low-Level I/O Programming

Description
Asio is a cross-platform C++ library for network and low-level I/O programming that provides developers with a consistent asynchronous model using a modern C++ approach.

Details
Asio is a cross-platform C++ library for network and low-level I/O programming that provides developers with a consistent asynchronous model using a modern C++ approach.
Asio is also included in Boost but requires linking when used with Boost. Standalone it can be used header-only provided a recent-enough compiler.
Bug reports can also be registered at the GitHub issue tracker at https://github.com/eddelbuettel/asioheaders/issues.
